FMEA — 20-minute guided exercise

FMEA — 20-minute guided Excel exercise

Module 3 only. Use the prepared Worked-Reference.xlsx; all three exercises use one working copy.

4 min · Read the prepared FMEA

Continue with the same workbook. Open FMEA_Review and ScoringNote. The six rows and provisional scores are supplied; do not generate a new system or rescore every row.

10 min · Prompt and check priorities

Use FMEA2 to explain or sort a copy by RPN and flag S>=9. Recompute FM01: 7×5×4=140. Check FM04: S=9 and RPN=90 still require severity review. Keep IDs attached to their source rows.

6 min · Review one row

Write one evidence gap for FM01 and one action proposal. Keep residual ratings unassessed. The multi-persona debate is a trainer demonstration in Module 2, not an extra participant task.

Optional after class — not scheduled

Starter.xlsx and the complete prompts.md bank support rebuilding the analysis, chart and extended review later. Only the selected core prompt is required in class.
