TOPIC 4 · CREATE A PROFESSIONAL PRESENTATION WITH POWERPOINT COPILOT
LAB 10 THEME · PROFESSIONAL HANDOFF

Lab 10 — Refine and Present the Maintenance Decision Deck

Maps to	LO4: turn verified dashboard evidence into a professional management presentation
Duration	30 minutes
Tools	Microsoft 365 Copilot · Excel · Word · PowerPoint · Outlook
Mock data	data/Northstar_Work_Orders.xlsx
Course	GenAI for Engineers · v2.4
Prompts	https://tertiarycourses.github.io/IES-GenAI-for-Engineers/prompts/#lab-10

Goal

Polish a management deck, rehearse it, save a PDF and draft the handoff email.

What You Will Build

Northstar_Management_Final.pptx and .pdf, and an unsent handoff email draft.

Prerequisites

- Microsoft 365 account with Copilot available in Word, Excel, PowerPoint and Outlook. Availability depends on the assigned licence and tenant settings; confirm access with the trainer before class.
- Desktop Excel on Windows or Mac. Download this lab folder and open the files straight from its data folder; save any new file in the same folder. All data is fictional.

Data note

Northstar Water Services is a fictional water-pipe maintenance and service company. All service hubs, staff and work orders are synthetic. Use the fixed reporting date 2026-09-30; missing facts remain UNKNOWN. Proposals do not change real assignments. Training email drafts are never sent.

Steps

Step 1. Review the deck. Open data/Northstar_Management_Draft.pptx in PowerPoint and save it as Northstar_Management_Final.pptx. Open Copilot, send the prompt and read the list.

PROMPT / CHECK — copy and adapt

```
POWERPOINT COPILOT:
Review these 8 slides. List crowded slides, unclear headlines, missing labels and any number without a source. Don’t change anything yet.
```

Step 2. Fix it. Send the prompt, check that every number is unchanged, then save.

PROMPT / CHECK — copy and adapt

```
POWERPOINT COPILOT:
Fix the problems you listed: clear headlines, less text and readable charts. Add a 45-second speaker note to each slide. Keep every number and keep 8 slides.
```

Step 3. Rehearse. Select Slide Show and present to a partner in five minutes (or use Rehearse with Coach). Fix one thing your partner found unclear.

PROMPT / CHECK — copy and adapt

```
Check : one change made after the rehearsal
```

Step 4. Save a PDF. Select File > Export > PDF and save Northstar_Management_Final.pdf. Open the PDF.

PROMPT / CHECK — copy and adapt

```
Check : 8 pages, every chart and number readable
```

Step 5. Draft the handoff email. In Outlook start a new email to operations.manager@example.invalid and attach Northstar_Management_Final.pdf and data/Northstar_Work_Orders.xlsx. Select Copilot > Draft with Copilot, paste the prompt and select Generate. Select Keep it, then close the email without sending it.

PROMPT / CHECK — copy and adapt

```
OUTLOOK COPILOT:
Write a short handoff email for the attached Northstar management deck (PDF) and dashboard
workbook. Give the 30 September 2026 scope, the key findings (120 total, 60 backlog, 50
overdue and 6 unassigned), the proposed actions and the decision needed. Say the PDF is a
snapshot and the workbook is interactive. Don’t say anything is approved.
```

Copy buttons for every prompt: https://tertiarycourses.github.io/IES-GenAI-for-Engineers/prompts/#lab-10

Test It

Check	Expected result
Deck	8 slides, same numbers, speaker notes added.
PDF	8 readable pages.
Email	Two attachments; stays in Drafts; nothing approved.

Troubleshooting

If this happens	Fix
Copilot cannot see my file	In Excel, save the file and open Copilot again. In Word, PowerPoint or Outlook, upload the file with + > Upload images and files, and upload it again after you change it.
A number is different from the lab	Clear any slicers or filters, check the table has no extra rows, then ask again in a new chat.
A button or feature is missing	Check you are signed in with your course account and Microsoft 365 is up to date, then tell your trainer.

Challenge

Repeat the task for one different site and explain how the filter scope changes the result. Keep the original verified output.

Reflection

Which evidence proves the output is correct, and which decision still needs a person?
