Lab 3.3 source pack

All records are fictional training data. They describe no actual facility, person or organisation. Values are teaching assumptions, not approved design criteria. Do not use outputs to operate, maintain or approve real equipment.

discipline-options.csv

discipline: Civil; training_component: Drainage inspection; known_parameter: Three inspection points; requires_confirmation: Real design rainfall and acceptance criteria

discipline: Mechanical; training_component: Pump package; known_parameter: 50 m3/h at 30 m head; requires_confirmation: Materials compatibility

discipline: Electrical; training_component: Control panel; known_parameter: Two pump status inputs; requires_confirmation: Supply protection and real ratings

discipline: Systems; training_component: Alarm interface; known_parameter: Four training signals; requires_confirmation: Failure states and cyber controls

discipline: Manufacturing; training_component: Fill process; known_parameter: 10.0 plus or minus 0.6 L; requires_confirmation: Stable process and measurement system

discipline: Water environmental; training_component: Dosing skid; known_parameter: Four functional elements; requires_confirmation: Fluid identity and exposure limits

spec-pack-template.md

Discipline specification pack
Specification
Purpose, requirements with IDs, units, sources, acceptance evidence, gaps
Design checklist
Requirement, check, evidence, reviewer, status
SOP planning outline
Scope, prerequisites, hold points, approved procedure references, handback
Troubleshooting guide
Symptom, possible causes, evidence needed, safe escalation, source
All content remains DRAFT FOR REVIEW. No physical task is authorised.

DES-01-rev2.md

DES-01 Pump design note revision 2
Fictional training reference. Effective 2026-08-01. Supersedes revision 1.
Clause 2 Duty
Nominal delivery is 50 m3/h at 30 m head.
Clause 3 Classroom acceptance
The teaching acceptance band is plus or minus 5 percent of nominal delivery, hence 47.5 to 52.5 m3/h. Record three readings at agreed duty, instrument identity and witness. This is not a published engineering standard.
Clause 4 Materials
Wetted materials remain TBD pending fluid identification and compatibility review.
Clause 5 Release
Responsible engineer review is required before any real-world use.
