IES

Lab 2.3 · Risk Assessment and Method Statement

Use E-MAP to draft a risk and method pack.

Goal	Use E-MAP to draft a risk and method pack.
Output	Risk draft, method sequence and approval gaps.
Time box	Use the Lesson Plan time; stop at the stated module boundary.

Concept and workflow

Frame the engineering question and identify the permitted evidence. Plan the output and acceptance check. Generate with Copilot. Inspect every source, formula, unit and assumption. Verify one result independently. Correct one precise gap, rerun, and save the evidence.

Prompt to use

Use the supplied task conditions. Draft hazards, existing controls and method steps.

Engineering boundary

Do not assign final risk acceptance or competent-person approval.

Evidence to retain

Risk draft, method sequence and approval gaps. Save the final prompt, source filenames, one independent check, correction history and reviewer.

Microsoft 365 route and checks

Open https://m365.cloud.microsoft/ and choose the relevant Copilot surface. For agents use https://m365.cloud.microsoft/chat/ and the Agents entry. For SharePoint use https://www.microsoft365.com/launch/sharepoint. Interface labels may vary by tenant.

Acceptance checklist

- Correct source and revision selected
- Output matches the requested format
- Formula, unit or citation independently checked
- Unknowns remain visible
- No invented cause, limit or approval
- Human reviewer and release decision recorded
