IES

Lab 3.2 · DMAIC with SPC

Build a DMAIC report with SPC and Cp/Cpk read-out.

Goal	Build a DMAIC report with SPC and Cp/Cpk read-out.
Output	Five-phase report, Pareto evidence, control chart and cautious capability note.
Time box	Use the Lesson Plan time; stop at the stated module boundary.

Concept and workflow

Frame the engineering question and identify the permitted evidence. Plan the output and acceptance check. Generate with Copilot. Inspect every source, formula, unit and assumption. Verify one result independently. Correct one precise gap, rerun, and save the evidence.

Prompt to use

Use WeeklyData and PumpReadings. Show formulas, fixed baseline limits and separate facts from hypotheses.

Engineering boundary

A chart signal is not a root cause; capability is conditional on stability.

Evidence to retain

Five-phase report, Pareto evidence, control chart and cautious capability note. Save the final prompt, source filenames, one independent check, correction history and reviewer.

Microsoft 365 route and checks

Open https://m365.cloud.microsoft/ and choose the relevant Copilot surface. For agents use https://m365.cloud.microsoft/chat/ and the Agents entry. For SharePoint use https://www.microsoft365.com/launch/sharepoint. Interface labels may vary by tenant.

Acceptance checklist

- Correct source and revision selected
- Output matches the requested format
- Formula, unit or citation independently checked
- Unknowns remain visible
- No invented cause, limit or approval
- Human reviewer and release decision recorded
