IES

Lab 4.1 · FMEA Assistant Agent

Build and test a multi-step FMEA Assistant.

Goal	Build and test a multi-step FMEA Assistant.
Output	Agent instructions, knowledge, positive and negative tests.
Time box	Use the Lesson Plan time; stop at the stated module boundary.

Concept and workflow

Frame the engineering question and identify the permitted evidence. Plan the output and acceptance check. Generate with Copilot. Inspect every source, formula, unit and assumption. Verify one result independently. Correct one precise gap, rerun, and save the evidence.

Prompt to use

Validate fields; stop on missing S/O/D; calculate; apply severity gate; require human review; draft report.

Engineering boundary

The agent must not choose ratings or approve risk.

Evidence to retain

Agent instructions, knowledge, positive and negative tests. Save the final prompt, source filenames, one independent check, correction history and reviewer.

Microsoft 365 route and checks

Open https://m365.cloud.microsoft/ and choose the relevant Copilot surface. For agents use https://m365.cloud.microsoft/chat/ and the Agents entry. For SharePoint use https://www.microsoft365.com/launch/sharepoint. Interface labels may vary by tenant.

Acceptance checklist

- Correct source and revision selected
- Output matches the requested format
- Formula, unit or citation independently checked
- Unknowns remain visible
- No invented cause, limit or approval
- Human reviewer and release decision recorded
