IES classroom source — CW-401 test record

Document ID: TR-401. Revision: 1. Status: fictional training extract.

1. Record the test ID, timestamp, collected volume in litres and collection duration in seconds.

2. Record the pump setting, the operator role and any observed issue.

3. Keep the original test record. Mark missing measurements as missing; do not invent replacements.

4. A reviewer checks the recorded values and calculation before the test summary is shared.

This extract specifies record fields for a classroom example. It is not an operating or safety procedure.
