TOPIC 4 · CREATE A PROFESSIONAL PRESENTATION WITH POWERPOINT COPILOT
LAB 10 THEME · PROFESSIONAL HANDOFF

Lab 10 — Refine and Present the Maintenance Decision Deck

Maps to	LO4: turn verified dashboard evidence into a professional management presentation
Duration	30 minutes
Tools	Microsoft 365 Copilot · Excel · Word · PowerPoint · Outlook · OneDrive
Mock data	data/Northstar_Work_Orders.xlsx
Course	GenAI for Engineers · v2.3
Prompts	https://tertiarycourses.github.io/IES-GenAI-for-Engineers/prompts/#lab-10

Goal

Refine the management deck using the same custom skill and reviewed dashboard evidence. Improve hierarchy, consistency and speaker notes, test the story in a short rehearsal, and prepare a reviewed Outlook handoff draft. The final pack preserves the distinction between a static presentation snapshot, a refreshable dashboard and a manager's unmade decision.

What You Will Do

Refine the management deck using the same custom skill and reviewed dashboard evidence. Improve hierarchy, consistency and speaker notes, test the story in a short rehearsal, and prepare a reviewed Outlook handoff draft. The final pack preserves the distinction between a static presentation snapshot, a refreshable dashboard and a manager's unmade decision.

What You Will Build

Northstar_Management_Final.pptx/PDF, a rehearsal record, final evidence register and unsent Outlook handoff draft with accurate artifact links.

Prerequisites

- Microsoft 365 account with Copilot available in Word, Excel, PowerPoint and Outlook. Availability depends on the assigned licence and tenant settings; confirm access with the trainer before class.
- Desktop Excel on Windows or Mac is recommended; save working copies to your assigned OneDrive course folder with AutoSave on. Do not overwrite the supplied input.
- Download this whole lab folder. All files are synthetic; work-genai is your own learner output folder.
- Lab 9 management draft, reviewed presentation brief and evidence register.

Data note

Northstar Water Services is a fictional water-pipe maintenance and service company. All service hubs, staff and work orders are synthetic. Use the fixed reporting date 2026-09-30; missing facts remain UNKNOWN. Proposals do not change real assignments. Training email drafts are never sent.

Steps

Step 1. Open your Lab 9 draft and save as Northstar_Management_Final.pptx. Open the same reviewed brief in the file picker; confirm native skill or label manual practice.

Step 2. Ask the skill to audit before editing. It should report crowded slides, weak evidence, missing labels and inconsistent scope. Review the list yourself against the evidence register; styling changes must never change values.

PROMPT / CHECK — copy and adapt

```
POWERPOINT COPILOT:
@maintenance-reporting Audit this eight-slide deck against the selected verified Northstar
brief. List inaccurate figures, ambiguous units, date/scope omissions, unsupported causal or
approval wording, dense text and weak hierarchy. Propose corrections; do not change values or
source facts.
```

Step 3. Apply only the reviewed corrections. Keep white/navy/blue with teal highlights, one main message, readable labels, consistent chart formats and source notes. Ask for concise speaker notes; check that notes do not introduce new numbers or promise assignment approvals.

PROMPT / CHECK — copy and adapt

```
POWERPOINT COPILOT:
@maintenance-reporting Apply the reviewed design and wording corrections to the existing eight
slides. Improve hierarchy and whitespace, make titles claim-led, retain accurate figures and
charts, and add 45-second speaker notes per slide. Separate observed findings from proposed
actions and end with the decision requested. Preserve the baseline date/scope; do not
duplicate slides.
```

Step 4. Use Slide Show to inspect at presentation size. Run a five-minute rehearsal with a partner or PowerPoint Rehearse with Coach if available. Ask the partner to identify the reporting date, highest-priority evidence and decision requested. Record one actual change in the Evidence_Log sheet; do not fabricate feedback.

PROMPT / CHECK — copy and adapt

```
POWERPOINT COPILOT:
Using only this Northstar Water Services decision deck, propose three rehearsal questions a
service operations manager could ask about overdue jobs, technician capacity and proposed
priorities. Suggest where the existing evidence supports an answer and where it remains
UNKNOWN. Do not invent partner feedback or alter the evidence.
```

Step 5. Export File > Export or Save As > PDF. Open the PDF and verify eight pages, readable charts and all visible values. Compare PPTX, PDF, Word brief and dashboard against the evidence register. Keep the source workbook with All filters and the archived refresh-test copy separately.

Step 6. Open Outlook and create a draft to operations.manager@example.invalid. Provide the reviewed brief and the actual OneDrive links to the dashboard/deck. Ask Copilot to draft a handoff email; it may not invent shared links or claim a sent attachment. Keep the email unsent and save a local reviewed TXT copy.

PROMPT / CHECK — copy and adapt

```
OUTLOOK COPILOT:
Draft a short Northstar management handoff email using this verified brief and the links I
provide. State the 30 September 2026 baseline scope, headline findings, proposed actions and
decision required. Explain that the PowerPoint/PDF is a static snapshot while the Excel
dashboard is interactive. Leave missing links UNKNOWN. Do not claim approval or send the
draft.
```

Step 7. Complete a final handoff checklist in the Evidence_Log sheet: workbook source and controls, working filters, sandbox refresh proof, skillv2 installation/manual record, eight-slide PPTX/PDF, reviewed notes, evidence register and unsent draft. Record the exact filenames and your actual checks. Save the final pack in work-genai.

PROMPT / CHECK — copy and adapt

```
WORD COPILOT:
Review the final Northstar Water Services handoff evidence I supply: baseline workbook,
refresh-test record, skill v2, eight-slide deck and PDF, brief, source register and unsent
email draft. Return a completeness checklist with verified evidence and missing items UNKNOWN.
Confirm every artifact uses the same baseline date/scope; never claim approval, submission or
sending.
```

Sample Prompts

Use the app labelled for each prompt (or adapt it). Name the table and columns, state the output, and always verify the result. Use the linked prompts web page for one-click Copy buttons.

Copy-ready prompts: https://tertiarycourses.github.io/IES-GenAI-for-Engineers/prompts/#lab-10

#	Purpose	Prompt
1	Scope	State actual source, report date and selected scope before acting.
2	Verify	Explain the source/formula checks and preserve unknowns and original records.

Test It

Check	Expected result
Presentation integrity	Eight slides and eight PDF pages; visible figures agree with verified register.
Professional delivery	Readable chart labels, consistent design, evidence-specific notes and actual rehearsal improvement.
Final continuity	Baseline dashboard, brief, deck and unsent draft agree; static snapshot stated.
Decision boundary	No real email sent or work order reassigned; proposed actions remain proposed.

Troubleshooting

If this happens	Fix
Copilot cannot find the source	Use the app file picker to select the actual OneDrive file. A typed local path or a different app chat is not shared context. If needed copy only the verified snapshot into the current app.
A total disagrees with Control	Clear dashboard filters to All, check table extent and duplicate IDs, recalculate, then compare definitions and reporting date. Reconcile before continuing.
The named feature is missing	Confirm the correct assigned account, English display language and app version. Use the stated manual practice route; record feature unavailable. This is not evidence that a native skill ran.

Challenge

Repeat the task for one different site and explain how the filter scope changes the result. Keep the original verified output.

Reflection

Which evidence proves the output is correct, and which decision still needs a person?
